23 KELLY GOODMAN: Yeah, I'm wondering who's going
|24 to be driving the trucks. And I'm also wondering, in
55 |25 the state of the art technology that we have in
00011
56 | 1 teleconference here, I don't see anyone except everybody
| 2 in Carson City. I don't see Reno. I don't see
57 | 3 Las Vegas. I don't see Washington. Do we not have
| 4 enough funds to see each other? I'm a little upset
58 | 5 about that.

| 6 This is unbelievably -- in a time where science
59 | 7 has leading and cutting edge technology, to take
| 8 something back from the archives and try -- maybe 30
60 | 9 years ago, maybe it would have worked. It's not going
|10 to work now.

61 |11 I love your comments, the terrorism. Who's
|12 driving the trucks? Who's responsible in what
62 |13 communities? Is it a small town community who's
|14 responsible for the cleanup? Who is responsible for the
63 |15 health and safety and welfare of anyone in the United
|16 States that this comes through their communities?

64 |17 The first thing is Nevada is a state that is
|18 built on tourism. It's a service industry state,
65 |19 resorts and service industry. There were 50 million
|20 tourists last year that visited the Las Vegas area. Do
66 |21 you think that one spill is going to invite those
|22 tourists from Japan, places around the world? They're
67 |23 going to hear that they don't want to come to Nevada.

0014

1 |24 They can go anywhere else. They don't have to come
|25 here.

2 00012

| 1 So I'm asking the Department of Energy if each
3 | 2 of the persons that are employees of the Department of
| 3 Energy, if you like this idea and you're backing it, I
4 | 4 want to know that you're a hundred percent personally
| 5 responsible for putting this through. And also
5 | 6 personally and financially responsible for the class
| 7 action lawsuit that will be filed on the behalf of every

6 | 8 citizen in the State of Nevada, every citizen that comes
| 9 to the community and destroys the health and welfare of
7 | 10 their communities. Plan on that. You know the tobacco
| 11 tax? Everybody's getting a lot of money from that. You
8 | 12 guys might be next.

| 13 The other thing is your wanting to put this
9 | 14 nuclear waste on land that does not belong to you. It
| 15 is not property you want to build a \$60 million tomb on,
10 | 16 land that is illegally taken over by the Department of
| 17 Energy.

11 | 18 I disagree with this. I ask the United States
| 19 government to think wisely and make science --
12 | 20 scientific decisions about solar wind and hydrogen
| 21 recycling decisions based on new technology, not on an
13 | 22 ancient thing. You can just say -- the Department of
| 23 Energy can just say we don't know what to do with it.
14 | 24 So don't do anything with it at all. Just move along
| 25 and look for better answers than this.

15 00013

| 1 Thank you.
